'Hydraulic repair solutions' is our new tag line where we advise the best economical repair for pumps, motors and components.

Difficult to find hydraulic spare parts to rebuild hydraulic pumps and motors can be re-manufactured by MH.

### Benefits of re-manufacturing hydraulic spare parts?

Re-manufacturing spare parts can save you a lot of downtime and money. *Old hydraulic systems can have a new life.*

A great example of the benefit of re-manufacturing is a JAHNS JT 55 Pump from this KREBS HELIOS boat.

This hydraulic ship-steering pump, manufactured in 1961, has no spare-part information available, making it difficult to repair. The owner thought he had no alternative but to carry out a costly, major refurbishment of the entire steering system.

With the vast MH Hydraulics manufacturing knowledge, we were able to replicate the necessary spare parts and to rebuild the old pump as good as new.

All custom made spare parts must undergo rigorous inspection and testing. After assembling the unit, Norske Veritas witnessed the test and we got a 100% approval. Fit for a new life.

**MH Hydraulics strives for a greener environment by repairing/remanufacturing old hydraulic pumps and motors since 1973.**
