MH-STB Series Test Benches

Static hydraulic testing of valves, motors and cylinders

This standalone test bench series is designed to meet all your static testing needs and can be customised to fit your specific requirements. System offers a choice of flow rates, pressure ranges, and extra equipment to suite all your needs. All test benches have electronically controlled pressure and flow rate controls. This is all done and monitored by the Siemens touch control screen and panel. Unit includes electric solenoid voltage supply, additional pressure sensors for monitoring, and our test report generating system.

Rated powers	45 Kw
Available flow rates	88, 108, 135 or 180 L/min
Pressure rating	350 Bar
Pilot flow rate	12 L/min
Pilot pressure rating	200 Bar
Suitable for	Cylinders Motors Valves Manifold assemblies
