# MH-DTB Series Test Benches

## Dynamic hydraulic testing of pumps

This standalone test bench series is designed to meet all your dynamic testing needs and can be customised to fit your specific requirements. System offers a choice of flow rates, pressure ranges, and extra equipment to suite all your needs. All test benches have electronically controlled pressure and flow rate controls. This is all done and monitored by the Siemens touch control screen and panel. Unit includes electric solenoid voltage supply, additional pressure sensors for monitoring, and our test report generating system.

Rated powers	110, 132 160 or 200 Kw
Available flow rates	300 or 450 L/min
Pressure rating	420 Bar
Pilot flow rate	12 L/min
Pilot pressure rating	50 Bar
Suitable for	Open loop hydraulic pumps with / without load sensing control Closed loop hydraulic pumps
