HYDRAULIC REPAIR SOLUTIONS

**MH CRC**

**THE GLOBAL HYDRAULIC  
QUALITY REPAIR SOLUTION**

MH CRC Business Report

# MH CRC proposal

MH hydraulics is a world leader in the field of maintenance, repair, overhaul and sales of hydraulic pumps, motors, cylinders and components. For over 45 years MH Hydraulics has been at the forefront of rebuilding hydraulics. Quality repair pays!

**45+**  
Quality  
years

MH Hydraulics is looking for partners to set up world class hydraulic repair centers around the world. These MH Hydraulic Repair Centers (CRCs/Certified Repair Centers) can repair/overhaul hydraulic pumps, motors, cylinders and components. With local management and staff and with MH as a technology partner. CRCs can expect Dutch assistance on the repair techniques and with remote training courses ensure world-

class repairs. Each CRC is independently managed and has the freedom to add product lines to suit the local market.

These added product lines can be another opportunity to share knowledge between the CRCs. CRCs are not exclusive but have preferred business benefits. A CRC is not forced into exclusive purchase agreements with MH, however we expect CRCs to share market knowledge. We expect CRCs to share market knowledge with the help of our THEMIS\* Database. A CRC has the obligation to repair with original or Genuine MH spare parts. Only then we can guarantee quality repairs.

\*THEMIS :THE MH Information System.

The MH CRC package can include a complete workshop to repair pumps, motors, cylinders and components. MH can offer complete systems to manufacture seals and assemble hydraulic hoses.

**ActionHydro**  
pumps, motors and components

Our sister company Action-Hydro gives us an excellent platform to service KPM Kawasaki Hydraulic products.

**Our field of expertise is mainly with the following brands:**

- BOSCH REXROTH
- KAWASAKI
- STAFFA
- LINDE
- LIEBHERR
- DENISON (PARKER)
- VICKERS (EATON)
- SAUER DAIKIN
- TOKYO KEIKI (formerly Tokimec)
- CONCENTRIC (formerly Haldex)
- MECABOR (Manifold blocks)
- AMCA

Of course technical solutions for other brands and hydraulic systems are exclusively available for CRCs.

MH CRCs will benefit from the growing world-wide CRC network, referrals, manpower pool with combined project management capacity and of course hydraulic repair expertise. Ideal partners are companies who already have an existing workforce to maintain, for example, marine equipment, trucks or other heavy equipment. Typical customers can be found in the Marine, Steel, Mining, Oil, Aluminium, Earthmoving or Manufacturing industry.

**If you are interested to become an MH CRC please contact us and we will be glad to explain our vision in more detail.**

**An MH CRC is "The Global Hydraulic Repair Solution."**

- Each MH CRC has state of the art Hydraulic repair equipment.
- Each MH CRC is connected with their nearest MH support center
