MH HYDRAULICS. DIFFER TO BE BETTER.

MH Flushing unit

MH Hydraulics has a hydraulic flushing unit as mentioned to flush hydraulic systems of average size. With the use of a flushing unit, the complete hydraulic piping system will be cleaned to an optimum level. Just by thoroughly cleaning and filtering, failures will be prevented and the hydraulic oil will be held in good condition.

Together with the rental of our flushing unit, a capable MH-engineer will attend if required. Our technical specialists are able to give you more information about the rental of our flushing unit.

SPECS:

Tank: 1200 ltr normal

Electro motors: 2 x 20Kw

Connections: 125 Amp / 380 Volt 50 Hz / 3 Phase / Zero / Earth

Return filter: 5 micron

2 pieces of press filters with element of your choice

PUMP CAPACITY:

Pump 1: 268 ltr / min at 23 bar

Pump 2: 105 ltr / min at 90 bar
